

Shree Sainath Electrocote Pvt. Ltd.

Shree Sainath
Electrocote Pvt. Ltd.
Since 1996

Company Overviews

Shree Sainath Electrocote Pvt. Ltd. is a recognized leader and innovator in the plating business, as well as a well-established manufacturer and supplier of a comprehensive range of mechanical components. Since its inception in 1996, the company has built a strong reputation for providing high-quality surface treatment and precision stamping solutions.

- Number of Employees: 60-70
- Infrastructure: Permanent (Ground +2)
- GST Number: 27AACCS1524L1ZC
- IEC: AACCS1524L

Services we are expert in :

1

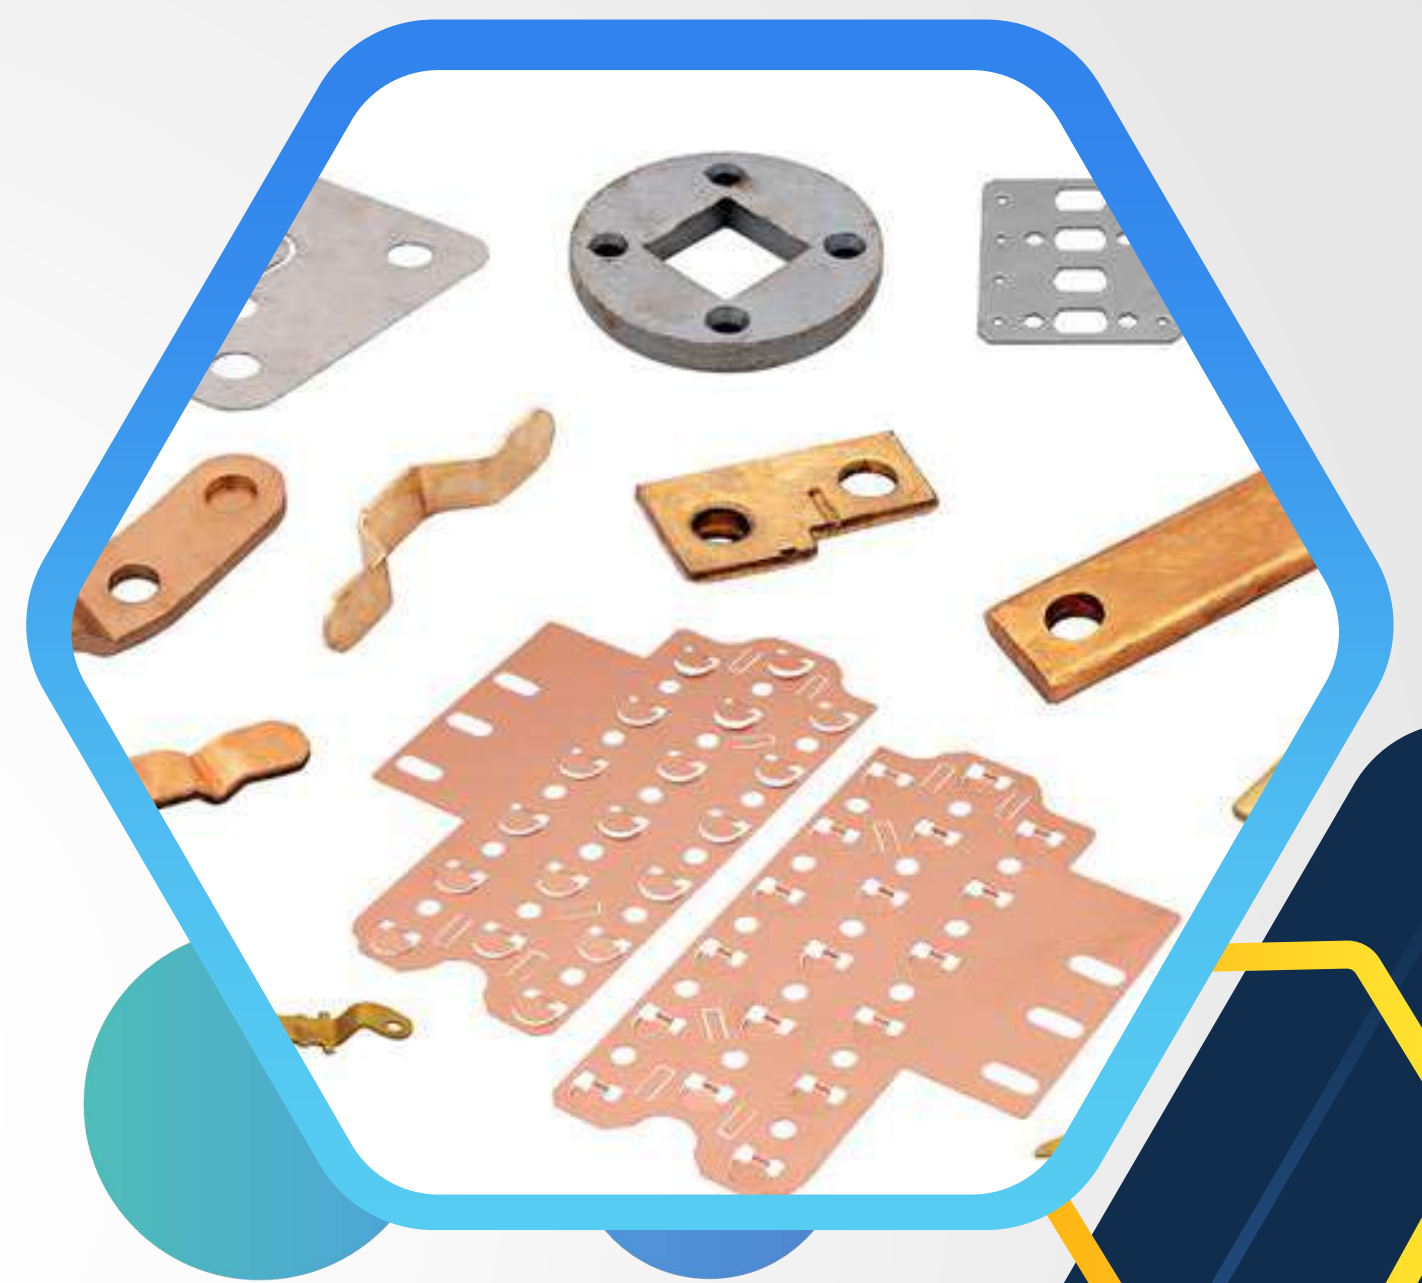

Surface Treatment Solutions : Iron-Zinc coating, Zinc coating, Copper plating, Silver plating, Tin plating, Plating on aluminum components and CED coated components.

2

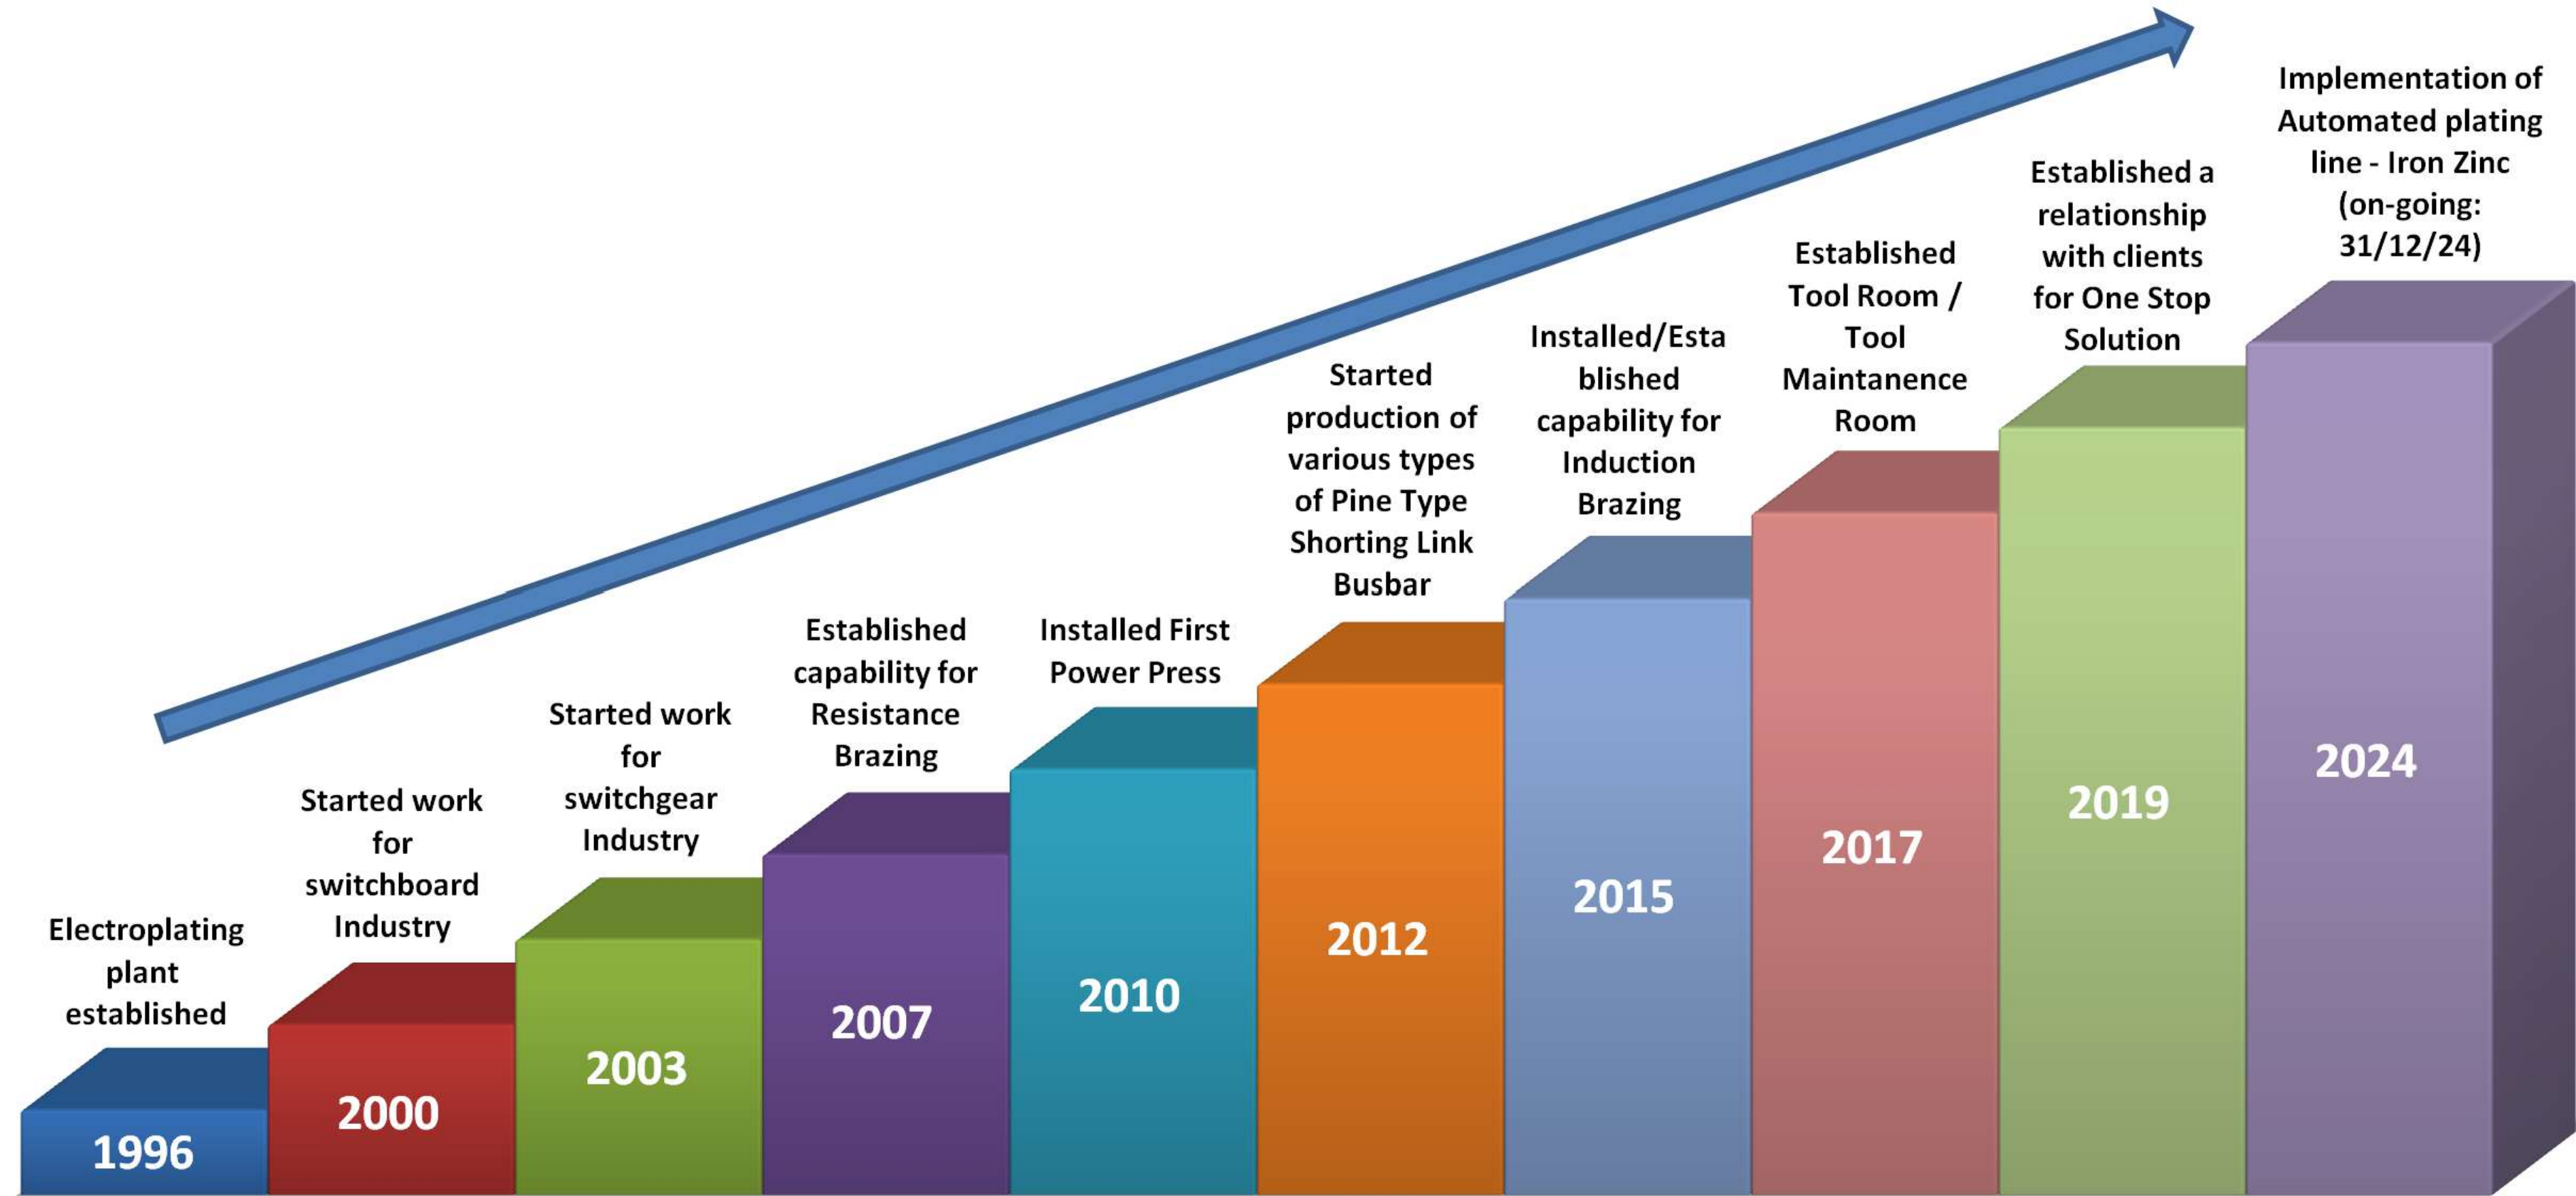

Resistance and Induction Brazing.

3

Manufacturing of Sheet Metal Components.

Growth Timeline

Why Us ?

We at Shree Sainath Electrocote Pvt. Ltd. are committed to quality, strictly adhering to industry norms and guidelines. By using top-grade raw materials and advanced machinery, we ensure that our products are known for sturdiness, durability, dimensional accuracy, and resistance to corrosion, making us a preferred choice in the market. Additionally, we offer electroplating services at competitive rates, further solidifying its market presence.

Operating out of a state-of-the-art infrastructure, our company is equipped with all necessary machinery and equipment to efficiently achieve its goals and objectives. The facility is organized into several operational units, each contributing to the company's high productivity.

Shree Sainath Electrocote Pvt. Ltd. is also known for its ethical work practices, which have helped attract and retain many highly reputed clients. Regular facility upgrades ensure that our company maintains its competitive edge in the market.

Infrastructure

- Zinc Electroplating line. (Tank and Barrel)
- Silver Electroplating line. (Tank and Barrel)
- Copper Electroplating line. (Tank and Barrel)
- Bright Tin Electroplating line. (Tank and Barrel)
- Matt Tin Electroplating line. (Tank and Barrel)
- Plating thickness testing instruments.
- Ph checking instruments.
- Conductivity testing instruments.
- SEW Power press 45 tons.
- Rajesh Power press 10 tons, 30 tons and 75 tons.
- Pneumatic Feeder.
- Hydraulic Surface Grinding machine.
- Semi automatic tapping machine.
- Manual tapping machine.
- Dynascan video measuring machine.
- Rockwell hardness tester.
- Resistance brazing machine.
- Induction brazing machine.
- Iron Zinc Electroplating line.(Automated line underdevelopment – 31/12/24)
- Cathodic Electro Deposition (CED) coating line. (Black color)
